

# Deploy a Production Instance of Inventory

## Steps to Deploy a Production Instance of Inventory

1. Log into <https://cloud.managementcouncil.org> and go to **Service Broker**
2. Find the "Inventory-RunAsProduction" catalog item, and click Request to run it.

### Inventory - RunAsP...

vRealize Orchestrator W...

Creates a running production instance of the SSDT Inventory Application. Requires "Reconfig USxS" be run after deploying.

Projects:

**REQUEST**

3. Fill out the form.

**ITC Name** will be filled in for you (unless you manage Redesign for other ITCs as well, if so, choose the ITC under the **Project** dropdown).

Choose which district to create Inventory for from the **District Name** drop-down.

## New Request

### Inventory - RunAsProduction

**Project \***

**Deployment Name \***

NOTE: After deploying Inventory, you must run "Reconfig USxS" to complete the attachment of Inventory to USAS.

**ITC Name \***

**District Name \***

**InstanceType**

Optionally, Add More Emails to Notify (The requestor will automatically get an email)    

**additionalEmailComments**

**SUBMIT**

4. Click the **SUBMIT** button to run the task. After it runs, you will get an email confirmation when it finishes.
5. Go back to Service Broker.

6. Find the "Reconfig USxS" catalog item, and click Request to run it.

### Reconfig USxS

vRealize Orchestrator W...

CAUTION: This item will reconfigure a production USAS or USPS instance. Use after deploying INVENTORY or WORKFLOWS.

Projects:

**REQUEST**

7. Fill out the form.

Be sure to choose "Production" for the **Instance Type**.

Under **Select an application deployment to reconfigure**, choose the itc-district-application combination for the district you need to reconfigure for Workflows.

For **Run Date/Time** choose a time to run this reconfig.

WARNING: Running Reconfig USxS will take the application offline for a few minutes, be sure to scheduled this to run during non-production hours!

## New Request

### Reconfig USxS

**Project \*** LACA State Software

**Deployment Name \*** ReconfigUSxS Fri, 18 Mar 2022 19:37:40 C

CAUTION: Running this item will reconfigure a production instance of USAS or USPS, taking it offline for a few minutes. Use this item after deploying a new INVENTORY or WORKFLOWS instance. INVENTORY and WORKFLOWS add new API keys into USAS configuration, but they do not take effect until you run this item to apply the changes and restart USAS/USPS.

For INVENTORY : Reconfig USAS ONLY!

For WORKFLOWS: Reconfig USAS and USPS both!

**ITC Name \*** LACA

**Instance Type \*** production

**Select an application deployment to reconfigure \*** laca-ce-usas

**Run Date/Time \*** 03/18/2022 10:00 PM

**SUBMIT**

8. Click the **SUBMIT** button to schedule the reconfig. After it runs, you will get an email confirmation that it completed

You will need to run this ONCE for Inventory, once for the district's USAS application. Inventory does not integrate with USPS.
